

Focused pulse sequence workshop, Århus, Apr 25-26, 2016

Planned activity

As agreed, on 25-26 April the Danish Center for Ultrahigh Field NMR Spectroscopy @ iNANO, Aarhus will organize a focused meeting with staff members from the various sites to discuss common practice and exchange of ideas, software, etc. This meeting will focusing on 3D, 4D filtered NMR pulse sequences, but with a clear possibility to extend into other advanced topics of interest to protein structure determination (diagonal-free NOESY, 3D/4D NOESY, ..).

please consider representation from your node, and already keep free in your agendas! Tammo Diercks (CIC biogune, Bilbao) and Sebastien Meier (formerly Carlsberg 800 MHz national Danish facility, now DTU) will participate, and invitations have been sent to Wolfgang Bermel (Bruker) and Eriks Kupce (Bruker). Please make suggestions if you have any particularly suitably related topics and people in mind that should participate in this workshop (also for budgetary reasons).
